

Acrylic Resin of Low Viscosity

RR PROTECT®

PRODUCT

RR Protect is a low-viscosity aromatic solvent-based acrylic waterproof resin, to enhance, protect and conserve various types of porous surfaces such as stones in general, fiberciment, concrete, tiles and others.

SEGMENTS OF USE

It is indicated for finish in:

- Concrete
- Porous floors
- Slate
- Bricks
- Concrete roof tiles
- Fiberciment roof tiles
- Ceramic roof tiles
- Ornamental rocks
- Finish for epoxy painting
- Polished floors

APPLICATION

Apply two coats of RR Protect to a low thickness lamb's wool roller, brush or airless spray gun in a dry place free from dust and grease. Between coats wait 12 hours.

CLEANING

Concrete floors, tiles, ornamental stones:

Use 50 mL of muriatic acid to each liter of water scrubbing and removing impurities. Neutralize with plenty of water.

Tiles and bricks: Wash with jet of water or sand the surface.

Note: To verify that the slate is completely dry, place a plastic bag on the surface with a weight on top for two days. If there are droplets of moisture, wait for complete drying of the floor for product application.

YIELD

15 m² per liter per coat.

90 ceramic roof tiles per liter.

Note: Yield can vary with porosity of surface.

PACKAGE

3.6 L

Color: colorless and colors

STORAGE

Keep the product in a fresh and ventilated place in a closed package.

INDIVIDUAL PROTECTIVE EQUIPMENT

Use long sleeves, PVC gloves and glasses.

MATERIAL IS FLAMMABLE.

IN CASE OF ACCIDENT

LEAKS: Remove all sources of ignition. Avoid breathing the vapors. Ventilate closed areas. Try to stop any leak. Add an absorbent in the area affected.
